## Faith

Faith is believing in the invisible, having full confidence in the unprovable and experiencing the courage that only comes from being certain that the universe has an important plan and in which you are to play a vital part in its destiny – *Peter Fleming*

Of all things necessary for MLM success, perhaps faith is the one that we most readily understand and yet the one that we least apply daily.

Faith is not about reckless optimism in the MLM business or in the products that you are promoting; nor is it the foolish pursuit of a lost cause. Such faith can ultimately be damaging to yourself and others.

Rather, it is a delicious combination of several other aspects of MLM success mentioned in this eBook, including belief, courage, enthusiasm and careful risk-taking. It is far beyond simply “turning up” or merely “playing in the game”, but it is a firm expression of optimism to yourself that the outcome will ultimately lead to success.

Faith in 3 areas will be decisive for you in this business:

- (1) Faith in the products/services and business opportunity that you offer
- (2) Faith in MLM as a worthwhile and moral profession
- (3) ... and by far most importantly ... **FAITH IN YOURSELF.**

In fact, most successful people agree that it is this unflinching faith in yourself and in the correctness of your purpose that will lead to overcoming obstacles, allowing you to focus on accomplishing the outcome; never weakly submitting to minor external forces.

**Make a daily decision to live your life with unwavering faith in yourself and in your purpose. Share this lesson with your team members until they really understand and apply it. You will feel better and immediately start to see an improvement in your business results!**
